

XLVI.—On two South African Genera of the Natural Order Passifloræ, with two Plates, from Drawings made by The Hon. W. H. HARVEY, of the Cape of Good Hope.

SINCE the publication of his very useful ‘Genera of South African Plants,’ our valued friend Mr. Harvey has not ceased to collect and draw and make notes upon new or rare species of plants of that interesting country, and we have now before us many excellent representations and remarks which he has kindly communicated to us. Two of these, which appear particularly deserving of a place in these ‘Annals,’ are the *Acharia tragoides*, Thunberg, and *Ceratosicyos Echlonii* of Nees von Esenbeck.

### 1. ACHARIA TRAGOIDES, Th.

(PLATE IX.)

We shall give the generic character of this in the words of Dr. Arnott, who has examined with great attention specimens lately sent to him, and which it will be seen differ remarkably from that of Thunberg.

GEN. CHAR.—*Flores* monoici. MASC. *Perianthium* tubuloso-campanulatum, 3-lobum, basi bracteolis tribus parvis cinctum. *Stamina* 6, triadelpa. *Filamenta* subulata, apice dilatata, et ibi antheras duas 2-loculares anticas ferentia. FÆM. *Perianthium* paullo ultra medium trifidum, basi tribracteolatum, in fructu increscens. *Ovarium* uniloculare, rostratum. *Styli* 3 (potius 1, tripartitus) bifidi. *Stigmata* 6, flabelliformia, membranacea. *Capsula* (brevis-pedicellata) 1-locularis, 3-valvis, 1- (vel rarius 2- aut 3-) sperma, valvis margine (post dehiscentiam) involutis, rostro styloque acuminatis. *Semen* ovoideum, arillo parvo unilaterali basi instructum. *Embryo* cylindricus, in axi albuminis carnosus et dimidio brevior. *Cotyledonus* radicularum æquilongæ. *Arn. Mst.*

Herba erecta gracilis. Folia alterna petiolata, exstipulata, profunde trifida, lobis oblongo-lanceolatis, acutis, cuneatis, incis. Flores axillares, subbini, cernui, brevi-pedunculati.

*Acharia tragoides*. Th. *Fl. Cap.* p. 37. *Harv. Gen. S. Afr. Pl., App.* p. 409.

*Hab.* Uitenhage, Thunberg, Zeyher.

Mr. Harvey, in his ‘South African Flora,’ judging from Thunberg’s description alone, thought this genus might belong to *Euphorbiaceæ* or *Urticeæ*; but now that he has received spe-
